

Olcay Ozdemir

Senior Frontend Developer

Istanbul, Turkey | [LinkedIn](#) | [GitHub](#)

PROFILE

Senior Frontend Developer with 7+ years of experience building scalable, production-ready web applications using JavaScript, TypeScript, React, and Next.js. Strong background in UI engineering, component-driven development, design systems and reusable UI component libraries, state management, testing, CI/CD, and performance optimization. Experienced in international, cross-functional teams across Singapore and Istanbul, collaborating closely with Product and Design to deliver client-focused products, mentoring other developers, and taking ownership of key technical deliverables end to end.

PROFESSIONAL EXPERIENCE

Senior Frontend Developer, Livegames

Istanbul

Aug 2024 - Present

- Develop and maintain scalable user interfaces using React and TypeScript for high-traffic applications, owning key technical deliverables from design to release
- Manage complex client-side state using MobX and RxJS, improving state consistency across the platform
- Build and maintain a reusable UI component library with Styled Components and Storybook, powering 10+ shipped games (and counting) on the platform and enabling faster team-wide development
- Drive best practices in software development, introducing new technologies and tools that improve code quality and team workflows, while mentoring and coaching other developers
- Collaborate closely with product, design, and backend teams to align on product goals and deliverables, supporting CI/CD release workflows with Jenkins

Frontend Developer, Kickoff by Zuju (Zuju Digital)

Singapore

Apr 2022 - Jan 2024

- Developed large-scale React and Next.js applications using TypeScript serving a global user base
- Implemented state management using Redux Toolkit, Zustand, and React Query for complex data flows
- Built and maintained a reusable UI component library (design system) with Styled Components, SCSS, and Storybook, reducing development time for new features across teams
- Created comprehensive E2E and visual regression tests with Cypress and Percy, and maintained CI/CD pipelines using Jenkins and AWS to improve release confidence
- Monitored production performance and resolved issues proactively using Datadog and Sentry, meeting availability, security, and performance service levels

Frontend Developer, TOKIGAMES

Singapore

Dec 2019 - Mar 2022

- Developed interactive web interfaces using React and TypeScript for a gaming platform
- Managed application-wide state using Redux Toolkit, ensuring predictable data flow
- Implemented responsive, standards-compliant layouts with HTML, CSS, and Styled Components across multiple device types, following W3C standards and accessibility best practices
- Documented UI components and variants using Storybook, improving team onboarding and consistency
- Integrated Cypress and BrowserStack for cross-browser and E2E testing, and worked with Web Components to build reusable, framework-agnostic UI elements

Frontend Developer, Evdekibakicim

Istanbul

Sept 2018 - Nov 2019

- Contributed to frontend development using Vue.js and later migrated components to React
- Built UI components using Styled Components and implemented responsive layouts with HTML5 and CSS3
- Translated product requirements and designs into functional, well-structured UI components

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML, CSS

Frameworks & Libraries: React, Next.js, Vue.js, Web Components, Internationalization (next-intl, i18n)

State Management: Redux Toolkit, Zustand, MobX, TanStack Query (React Query), RxJS

Styling & UI: Styled Components, Tailwind CSS, Radix UI, SCSS, Storybook, Design Systems, Responsive Design

Testing & Monitoring: Cypress, Percy, BrowserStack, Datadog, Sentry

CI/CD, Cloud & Tools: Jenkins, AWS, Vite, Git, GraphQL, REST APIs

EDUCATION

Web Programming, Anadolu University (Open Education) 2025

Computer Engineering, Dumlupinar University 2013 - 2019

Completed 3 years of Computer Engineering coursework

CERTIFICATIONS

Frontend Developer (React), HackerRank Aug 2024 · Verify: hackerrank.com/certificates/35f9a837402d

JavaScript (Intermediate), HackerRank Sep 2024 · Verify: hackerrank.com/certificates/0d210cd4ef77

PROJECTS

- **livegames.io** - Real-time gaming platform (Senior Frontend Developer)
- **Hayze** - Personal studio site built with Next.js 15 (App Router), React Three Fiber, and TypeScript (Side project)
- **minada.vercel.app** - Solar energy company website with savings calculator and blog CMS, built with Next.js and TypeScript (Freelance)
- **foremostmotion.com** - Industrial automation company website with product catalog, quote configurator, and calculation tools (Freelance)
- **doctrinavera.com** - Medical education platform - built the student portal with Next.js 16, React 19, and TypeScript (TanStack Query, next-intl localization, Google OAuth, block-based lesson content system) and the content management panel with React, Vite, Tailwind CSS 4, and Radix UI (TipTap editor, Zustand), both integrated with a REST API (Freelance)
- **evdekibakicim.com** - Caregiver marketplace platform (Frontend Developer)
- **smartmessage.com** - Marketing automation platform (Mobile & desktop UI bug fixes)
